

DID YOU KNOW?

A tiger's roar can be heard from up to 3 kilometers away! These magnificent big cats are not only powerful hunters but also play a vital role in maintaining healthy forest ecosystems.

Every year on July 29, the world celebrates International Tiger Day to raise awareness about tiger conservation and the importance of protecting their natural habitats. The day reminds us that safeguarding tigers also helps protect countless other plants and animals that share their forests.

Amazing Fact: No two tigers have the same stripe pattern —just like human fingerprints, each tiger's stripes are unique!
