Logging in for the First Time

Creating a Student Account with Email

Step 1: If your school is requiring you to use your email address as your username, when your teacher adds you to Hello Britannica, you will receive an email invitation with a temporary password.

Step 2: Click the link in the email invitation, enter the email address the email was sent to in the “Email” field and the temporary password into the “Password” field. Click **Sign in**.

Step 3: Enter a new password when prompted and reenter it to confirm that password and to complete initial account setup.

Step 4: Choose an avatar or skip this step.

How to Play Activities

Initial Level Placement Test

You will automatically be given a test the first time you log in to play activities.

This test determines your skill level, so you will automatically start at the level most comfortable for you in each unit.

Level Change by Your Teacher

Your teacher may determine that it might be more beneficial to your learning experience to change your level in Hello Britannica. Should your teacher adjust your level, you should logout and relogin to Hello Britannica. Once you relogin, you will see a pop-up informing you of the level change. While your progress will be reset to reflect your new level, you will retain all coins previously earned inside of Hello Britannica.

Home page

Step 1: Begin by navigating to **Home Page** in the left menu.

Step 2: Click on the first **unit** to open the **learning path** below.

Units

Learning Path

Topics

Activities

Step 3: Click on the first **topic** and select the first **activity**.

Gameplay

Coins

Earn coins by playing activities and spend coins on hints.

Each correct answer earns 3 coins.

Time Limit

Questions have a time limit. If time runs out, the question is counted as wrong. Pause the activity by pressing the pause button in the upper-left corner.

Hints

Spend coins on hints. The types of hints vary from activity to activity.

Hints Modal:

Use the coins you've earned to get hints

125 Total Coins

Remove one answer Add Time on Clock

How to View and Change Settings

Step 1: To access your settings, click the gear icon ⚙️ in the top-right corner above your profile picture.

Step 2: From here you can change your password, interface language, and log out.

How to View Your Profile

Begin by navigating to **My Profile** in the left menu.

Streak Marker: Shows how many days this week you've completed activities.

My Progress: View your progress and click **View Performance** to see specific performance metrics within each unit.

Using the Hello Britannica App Across Devices

The Hello Britannica app is accessible via a web browser as well as native Android and iOS applications, allowing learning to continue across devices.

Android and iOS apps are available to download via this [link](#). Click on the App Store or Google Play badges to download the app. This will require an existing Hello Britannica account to login.

Android and iOS App Functionality

Android and iOS applications provide support for use of the Hello Britannica applications, both, with and without internet access.

Use without Internet Access

To provide a quality learner experience in Hello Britannica when internet connectivity is interrupted, the Hello Britannica Android and iOS apps are designed to download a limited subset of content to your local device so that you can continue learning. To support this offline functionality, initial internet connectivity in the application is required:

- **What You Can Access:** When connected to the internet, the app will automatically start downloading the previous, current and next topic. You'll see a message that says, "Prefetching offline data." then, "Prefetching process successfully done." to confirm this process is complete. These topics will be available for you to work on offline.
- **What Won't Work Offline:** The *Placement Level Test* needs an internet connection to work, so make sure you're online when you take it. You won't be able to complete activities that rely on AI while offline (e.g. activities that include use of a microphone or evaluation of writing entries). Once connected to the internet again, you will be prompted to complete any skipped activities while offline.
- **Progress Tracking:** Your progress will be tracked on your device while offline. You can pick up right where you left off once you're back online!
