

NEW

**You've got a class?
We've got your Pack!**

LaunchPacks: Science combines up-to-date, curriculum-aligned content sets with tools that make it easier for teachers to differentiate instruction and for students to understand core Pre-K-12 science topics.

✓ **Personalize instruction for every student.**

Find content sets in four grade band levels, adjust the reading level difficulty for every article, or have text read aloud. Modify text size, translate into over 80 languages, and click on any word to hear its pronunciation and read its definition.

✓ **Meet content area literacy standards.**

Annotation tools, curriculum-focused images and videos, and expertly-curated science content allow teachers to facilitate close reading, build critical-thinking skills, and enhance student literacy skills, while teaching core science concepts.

✓ **Build connections between science disciplines.**

See connections between science disciplines through one tool that allows searching across all science concepts.

✓ **Round out content area understanding with diverse, curriculum-aligned content.**

Each of the 1,700 Packs available has been carefully curated by Britannica editors and educators to match the Pre-K-12 science curriculum. Each Pack includes a variety of multimedia resources.

✓ **Schedule reminders in your personal calendar.**

Build your own calendar and schedule “My Packs” reminders for future dates. Stay on top of upcoming events with Britannica “Recommended Packs.”

✓ **Dig in to your new tool belt: My LaunchPacks.**

A My LaunchPacks personal account allows teachers to save and share their favorite Packs, customize them with instructional notes, remove content, add activities, include Web links, or embed questions within articles to inspire inquiry.
