

Activity: Compare & Contrast

Name:

Grades: 3-5

Instructions

Compare two things, people, ideas, or events using the resources in this Pack. Think about how the two are the same. Then, contrast them by thinking about how they are different. What can you learn about each thing, person, idea, or event by studying them side by side?

Questions

Choose two resources to compare. Write the titles of the two resources you will use.

Study the two resources you picked. List two or three details that help you see how these resources are alike. In a few words, describe how they are alike.

Now look again at the two resources you picked. List two or three details that help you see how they are not alike. In a few words, describe how they are not alike.

Reflect on the process of comparing and contrasting. Did you learn something new by looking at these resources side by side? Explain what you learned.

What is something you may not have learned if you only reviewed one resource?
